

How Scenic Rim Vets Saved Emperors Gold

Emperors Gold (Mac) is a well-known local Stallion in southern QLD. He recently became very unwell and showed signs of colic. Luckily his owner opted for surgery and this is what they found:

This is a 2.6kg **enterolith**. An **enterolith** is a mineral concretion or calculus formed anywhere in the gastrointestinal system.

Mac is still under treatment at Scenic Rim Vets, but he is on the long road to recovery.
